

Role: Solar Proposal Evaluation Specialist

Responsibilities:

- Site Feasibility Assessment:** Evaluating the suitability of a site for solar installation, considering factors like sunlight exposure, shading, and structural integrity
- Techno-Commercial Feasibility:** Assessing the technical and commercial viability of solar projects, including the selection of appropriate technology and cost analysis
- Financial Viability Analysis:** Determining the financial aspects of solar projects, such as return on investment, payback period, and overall financial health
- Regulatory Compliance:** Ensuring that all projects comply with local, state, and national regulations and standards
- Stakeholder Coordination:** Collaborating with various stakeholders, including clients, engineers, and financial institutions, to ensure potential smooth project execution

Qualifications:

- Completed 2nd year of UG
- Pursuing 2nd year of UG and continuous education
- Completed 2nd year of diploma (after 12th)
- Pursuing 2nd year of 2 years diploma after 12th
- Grade 12th pass with 1 year Vocational Education & training
- Completed 3 year diploma after 10th Grade with 1 year relevant experience
- Grade 12th pass with 2 year relevant experience
- Grade 10th pass with 4 year relevant experience
- Previous relevant Qualification

Skills:

- Technical Knowledge:** Understanding of solar PV systems, including design, installation, and maintenance
- Analytical Skills:** Ability to assess site feasibility, perform techno-commercial evaluations, and analyze financial viability

3. **Regulatory Knowledge:** Familiarity with local, state, and national regulations and standards related to solar energy
4. **Financial Acumen:** Proficiency in financial analysis, including cost estimation, budgeting, and return on investment calculations
5. **Problem-Solving:** Ability to identify issues and develop effective solutions during the project lifecycle
